A large company logo will be added here with a link to your website.

that sync your bookmarks and tabs

Via a [Nextcloud](?), [Linkwarden](?), [Git](?) or [WebDAV](?) server for easy self-hosting or simply via [Google Drive](?). Floccus simply syncs and gets out of your way; no ads, no data collection, no nonsense; free and open source software.

Looking for tab syncing? Floccus has got you covered: Check out the [guides](#).

Floccus on Mastodon

Floccus v5.3.0 is out now with support for Linkwarden 🎉 🎆 Hop over to https://linkwarden.app if you're not familiar with it :)

What users are saying

The Floccus ecosystem, coupled with nextCloud Bookmarks App, has SIGNIFICANTLY improved my workflows for bookmark management across multiple computers.

It didn't take much work to set up, and it was TOTALLY worth it!

Fantastic free extension (and app available) that works like a charm! Support this project and it's very underrated.
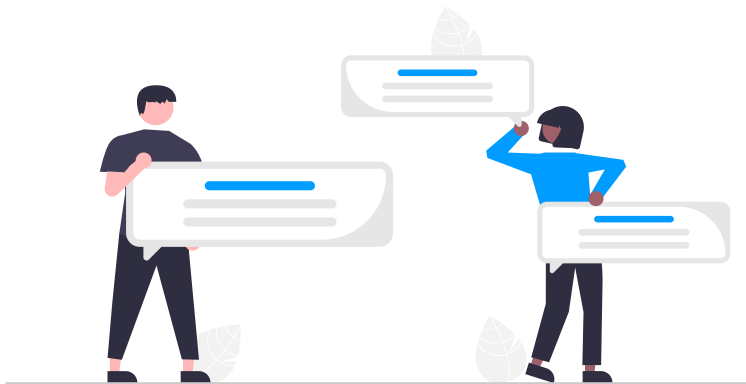

Spiritual successor to Xmarks, although this is superior. End-to-end encryption!

This extension is really amazing! Marcel, I want to write big thank you for what are you doing, keep going!

works 100% of the time, super easy to configure. respects privacy : you decide where your data are stored. Good job. Thanks for the Dev.

*I've been using it to sync between Firefox and Chrome since 2020, and while it had some problems syncing early on, it's been solid for so long I can't even *remember* the last time I encountered a sync error.*

*super tool - it does what it should*

Support floccus

Floccus is made possible by volunteers, especially by its creator Marcel Klehr, spending their free time to make floccus better, bit by bit.

GIVE SOMETHING BACK

Use your own skills to make floccus even better!
